

Henke Sass Wolf Econoscope Cavity Inspection Endoscope

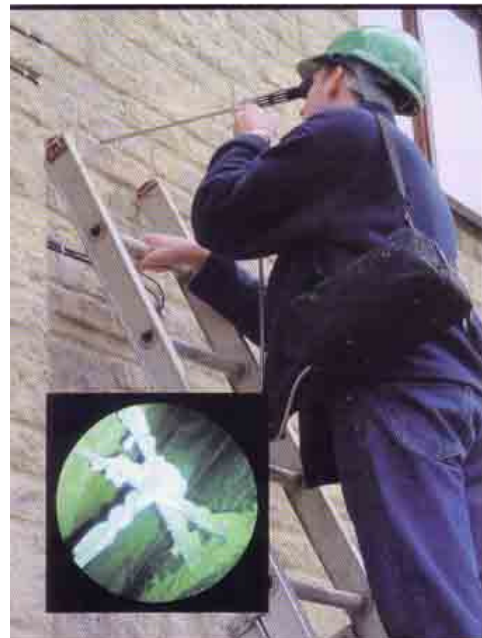

The Henke Sass Wolf Econoscope Cavity Inspection Endoscope is a high quality Rigid Endoscope with conventional lamp tip illumination. The Econoscope uses the same high quality optical components as the Cavity master Endoscope, but has a miniature quartz halogen lamp built into the tip. It can be operated from a rechargeable battery pack or its charger unit.

The Econoscope allows detailed internal visual inspection of building structures through small access holes without costly disruption and re-instatement. All kinds of structures can be inspected in this way, including cavity-walls, under-floor and between voids, ceilings and roof spaces, air-conditioning and heating service ducts.

Specification

Rigid Endoscope with fixed focus eyepiece
Endoscope Diameter 9.00mm
Working Shaft Length 315mm
Direction of View 90 deg side –view
Field of View 55 degrees
Depth of Focus 7mm to infinity
Illumination Quartz Halogen 6v 4.5w
Power Source Rechargeable sealed battery in strong leather case
Combined Charger/transformer
Spare Lamp
Connection Cable, charger to battery
ScopeSaver protection sleeve
Robust Polypropylene Case

V09/3/09
