

Provision Elite Articulating Endoscope

The Provision Elite Endoscope/Borescope is a high end inspection system boasting a 10,000 pixel count ensuring that you have a high resolution image coupled with a controllable/steerable tip to get the user to the point of interest. Lightweight and rugged the Provision Elite is made from precision machined aircraft grade aluminium and has a medical quality light source to ensure optimum viewing using standard 'C' batteries.

This Endoscope is ideal for applications like Aircraft repair, Automotive diagnostics and Industrial maintenance where the ergonomic, articulating tip allows the user to move the tip left or right and up or down to reach those inaccessible places. The Provision Elite dispenses of the need for costly demolition or disassembly.

Specification:

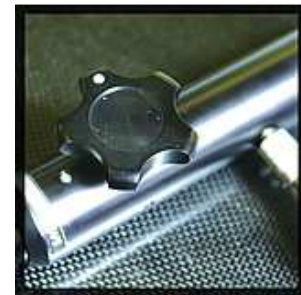

Cable Diameter: 6mm
Articulation: 4-way Up/Down Left/Right
+/- 120 degree
Bend Radius: 36mm
Field of View: 50 degree
