

## Pan & Tilt Drain Inspection Camera 60m & 120m

The Pan & Tilt Drain Inspection Camera comes with its own control box with a built-in LCD screen to review, monitor and record video footage in real-time. Video footage can be recorded directly onto the 128GB HDD or to a USB memory stick allowing for video footage to be viewed, stored and played back. With a Video out facility recordings can also be made directly to a media player or other recording device. The LCD screen, camera and DVR can be powered either from the Li-ion rechargeable battery or from a UK plug adaptor. The Inspection camera is mounted on a spring and connects to a fibreglass cable. Once connected, the user can view the images in colour on the built-in LCD screen.

The Pan & Tilt camera head is controlled by a joystick situated in the Control box allowing 360° Pan and 180° Tilt.

A QWERTY keyboard and Microphone Audio recording button is also located in the Control box.

The camera head is rated waterproof to IP68 up to 3 bar by the manufacturer.
