

## Ridgid MicroDrain Inspection Camera System

The Ridgid MicroDrain reel with interconnect cables can be used with either the Ridgid CA-300 Inspection Camera or the Compact SeeSnake LCD Monitor. The MicroDrain Inspection System allows you to quickly inspect places previously unreachable, providing true accessibility, increased efficiency and reduced job time.

The small diameter and tight turn radius camera head gets through most toilet traps and 40mm P traps without the need to disassemble or dismantle plumbing fixtures.

The unit is lightweight and compact allowing easy carry onto job sites providing solutions whenever and wherever they are needed.

The unit is of a durable and reliable construction quality as befits the Ridgid name.
